WORK EXPERIENCE

Google

Software Engineer

Sunnyvale, CA

Jun 2026 – Present

- Resolve bugs and contribute to infrastructure migrations across cluster management and process lifecycle systems, validating changes through monitoring and testing.

JPMorgan Chase & Co.

Junior Software Engineer

Jersey City, NJ

Oct 2021 – Jul 2023

- Built an NLP-powered support chatbot with intent detection and information retrieval; integrated it with enterprise messaging to improve responsiveness and reduce on-call load.
- Delivered Elasticsearch search and classification services to improve ticket routing and reduce resolution time.
- Developed distributed REST APIs with automated CI/CD deployments, sustaining **99.9% uptime**.
- Analyzed Kubernetes metrics with cross-functional teams to identify reliability and performance improvements.

Stony Brook University Division of Information Technology

IT Consultant Manager

Stony Brook, NY

Oct 2023 – May 2026

- Led training for 12+ consultants and handled escalated technical issues across assigned campus computer labs.
- Managed system upkeep and responded to outages in campus labs supporting 100+ concurrent users.

PROJECTS

Real-Time Messaging Platform

Jan 2026 – May 2026

- Built and operated a Kubernetes-based messaging platform; supported 550+ messages/sec, peaking at 5,000 concurrent connections in load tests using bots simulating human behavior.
- Built separate authentication, messaging, WebSocket, media, and search services with TypeScript and Node.js/Express, plus a React frontend.
- Reduced p95 message latency by **82% (462 ms to 85 ms)** under simulated user load by diagnosing and tuning MongoDB, Redis, WebSocket delivery, and rollout bottlenecks with Prometheus/Grafana.
- Automated provisioning and rollouts with Ansible; operated replicated MongoDB and Elasticsearch clusters with Redis, MinIO, and Longhorn storage.

Stock Trading AI App

Jun 2025 – May 2026

- Built a FastAPI pipeline connecting Reddit ingestion, FinBERT sentiment inference, ticker-level signal generation, and Alpaca paper-trading execution.
- Collaboratively fine-tuned FinBERT using 29K training examples, achieving **95.0% validation accuracy** and 0.950 weighted F1.
- Implemented position limits, market-hours checks, duplicate-position prevention, and trade logging; evaluated 2,996 signal decisions across 87 tickers.
- Developed a performance API comparing paper-trading returns against the S&P 500 and NASDAQ, with 87 paper orders submitted during the logged evaluation.

TECHNICAL SKILLS

Languages: Python, Java, C/C++, SQL, JavaScript, TypeScript

Cloud & Infrastructure: Kubernetes, Docker, AWS EC2, Linux, CI/CD, Ansible, Prometheus, Grafana

AI & ML: PyTorch, FinBERT, Pandas, NumPy

Backend & Data: FastAPI, Node.js, Express, REST APIs, PostgreSQL, MongoDB, Elasticsearch, Redis

EDUCATION

Stony Brook University

B.S., Computer Science with Honors; Applied Mathematics and Statistics

GPA: 3.82/4.00 | Dean's List: 2023–2026

Stony Brook, NY

Aug 2023 – May 2026

LEADERSHIP

Tau Beta Pi — New York Omicron Chapter

President

Jun 2025 – May 2026

- Led chapter operations as President, partnering with 12 student organizations to organize major campus events drawing **200+ attendees**.
- Led development of a disaster-relief drone for a national competition, designed to deliver supplies to affected communities.
